

## Change Plesk Administration password

- Go to Plesk Administration URL (e.g. <https://www.domainname.com:8443>).
- Login with your login and password.
- Click button "Login".
- From left menu, click button "Home".
- From window "Domain domainname.com", under section "Domain", click button "Domain Administrator".
- From window "Edit the properties of domain administrator's account", enter "New password" and "Confirm Password".
- Click button "OK" to confirm.
- From top right corner, click button "Log out" once complete.
